IMPORTANT SAFETY INSTRUCTIONS

⚠ **Warnings**:

- The CT500 must be connected to a grounded, metal, permanent wiring system; or an equipment grounding conductor must be run with the circuit conductors and connected to the CT500's grounding terminal or lead.

- The CT500 must be installed by a qualified electrician and in accordance with all local electrical codes and ordinances.

- Read all instructions before installing the CT500. Refer to the CT500 Installation Manual included in the CT500's shipping box.

- Adult supervision is required when using the CT500 near children.

- Do not operate a CT500 with a visibly damaged cable. Call Coulomb Customer Support immediately at 1-888-758-4389.

- Do not operate a CT500 if the enclosure or the charging cord is broken, cracked, open, or shows any other signs of damage. Call Coulomb Customer Support immediately at 1-888-758-4389.

- Do not put fingers into the charging cord.

- Do not install the CT500 near flammable, explosive, or combustible materials.

- Do not operate the CT500 in temperatures outside its operating range of -22°F to 122°F (-30°C to +50°C).

- The CT500 contains no user-serviceable parts. Do not attempt to repair or service the CT500 yourself. If the CT500 requires servicing, contact Coulomb Technologies.

- Ensure that the CT500's charging cord is positioned so it will not be stepped on, tripped over, or subjected to damage or stress.

After the CT500 has been successfully installed and is displaying a message indicating that the station is available, you are ready to charge your vehicle by following these simple instructions.

To start charging:

1. If the CT500's front label indicates that it is equipped with a card reader, hold a valid ChargePass™ card over the label. The station will display a message indicating that the card has been authorized. Skip this step if the CT500 is not equipped with a card reader.

Front label if the CT500 has a card reader

2. Remove the charging cord from its holster and plug it into the vehicle.

The top light FLASHES green to indicate that the vehicle is charging. If it doesn't flash, unplug the vehicle for a few seconds and try again.

When the vehicle is fully charged, the light stops flashing and illuminates SOLID green.

⚠ If the light on the front of the CT500 flashes RED at any time during the charging process, return the charging cord to its holster and try again. If it continues to flash or illuminate RED, contact Customer Support at 1-888-758-4389.

To stop charging:

Unplug the vehicle and return the charging cord to its holster.

When you unplug the vehicle, the light illuminates SOLID green for 30 seconds while the CT500 displays the elapsed time of the charging session (HH:MM:SS).

After 30 seconds, the light extinguishes and the CT500 displays its original message, indicating that the station is available for charging.

NOTE: You can also press the CT500's STOP button to stop charging at anytime without removing the charging cord. However, to start charging again, you will need to return the charging cord to its holster momentarily, then plug it back into the vehicle.

See reverse for important safety instructions.
