

Sales, Service and Motor Pool Solutions

Scaling Electric Vehicle Fleets

Be confident in moving your fleet to electric vehicles with ChargePoint Solutions for Sales, Service and Motor Pool Fleets.

The success of an electric vehicle (EV) fleet requires vehicles to be available when needed. ChargePoint solutions for sales, service and motor pool fleets ensure EVs are always fueled and ready to go. Make the most of your current electrical infrastructure and avoid costly upgrades without having to change the way you work.

Keep Vehicles Charged and Ready

Vehicles are the lifeblood of fleet operations. If they aren't ready to go at a moment's notice, work doesn't get done. ChargePoint fueling solutions help you get the most out of your EV fleet investment by ensuring that vehicles are charged and ready when drivers need them.

Total Control in the Cloud

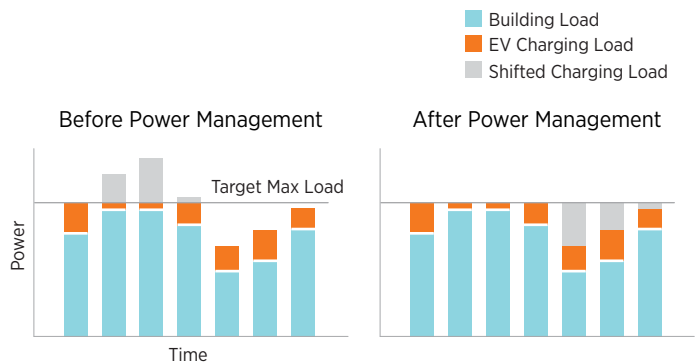

Because ChargePoint solutions are networked, they're easy to manage. Access critical data about charging activity, configure power management features, decide who can use your stations and set pricing remotely, all from a single dashboard interface. Notifications and alerts offer real-time updates, while downloadable reports provide detailed information and insights for further analysis.

Manage Energy Costs and Power Supply

Unless you are building your location from scratch, your electrical capacity is likely limited. ChargePoint extends the usefulness of your electrical infrastructure, enabling you to connect more chargers to existing transformers, panels and circuits and helping avoid demand charges from your utility. Schedule charging to avoid expensive peak energy rates. Power needs will change as your fleet grows, and ChargePoint has the most comprehensive, configurable set of power management options to address those changes when they happen.

Balance Your EV Charging and Building Loads

Count on Our Reliable Hardware

Fueling is critical to your daily operations. That's why you need a durable, proven charging solution that will stand the test of time. ChargePoint offers the most reliable, industry-leading AC and DC charging stations on the market. Our smart, networked stations can hold up to the constant use of fleets. With ChargePoint, your EV fleet is always ready to go.

Control Costs

Although they provide a critical service, fleet vehicles are frequently treated as a cost center that needs to be tightly managed. Due to their lower maintenance and fueling costs, EVs help reduce operational expenses. However, expensive electrical upgrades and charging infrastructure can delay those benefits. ChargePoint intelligently uses the power you have available, which helps you avoid costly demand charges and infrastructure upgrades, up front and down the road.

Maximize Your Investment

Some fleets choose to have dedicated charging stations for their drivers, while others want to make EV charging available to other employees and the public. ChargePoint enables you to configure access control and pricing policies to make stations available to the public for a fee during the day, and restrict access to your fleet for overnight charging.

Let Members of the Public Charge at Your Stations

Simplify Purchasing

Procuring an EV charging solution doesn't have to be complicated. ChargePoint solutions are available through Sourcewell and various sales and installation partners. No matter how you choose to purchase your ChargePoint solution, it will be backed by our network and support.

Rest Easy with Warranty and Support

Gain peace of mind with ChargePoint® Assure™, the industry's most comprehensive EV charging maintenance and management program. Your stations are monitored 24/7 and repair technicians are proactively dispatched if an issue is detected. ChargePoint also provides 24/7 support for EV drivers to resolve any issues.

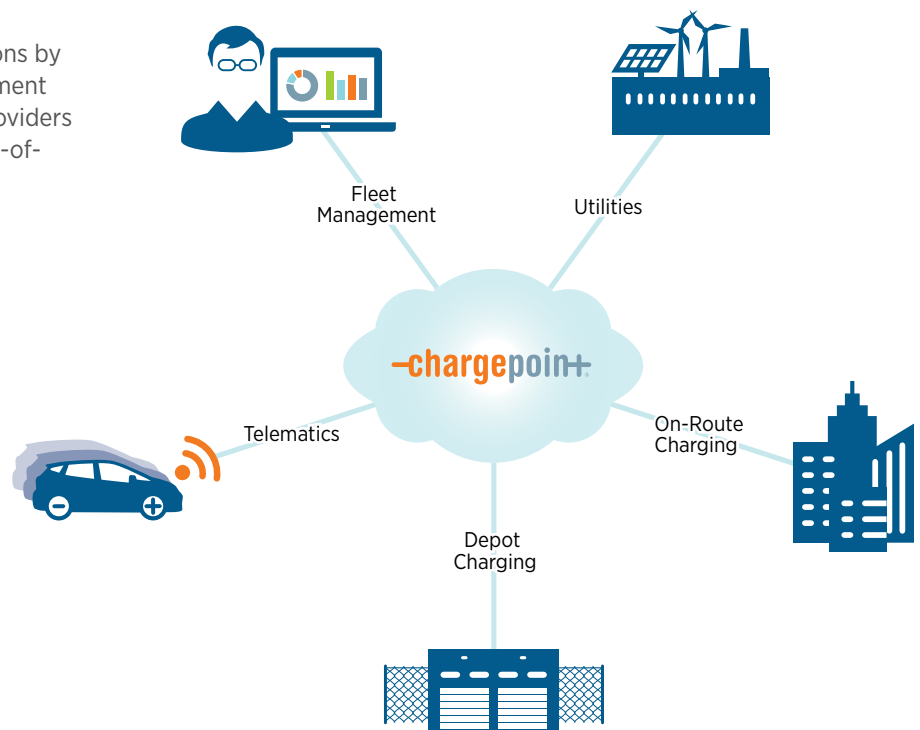

Work Your Way

It may seem daunting to transition to an electric fleet. You worry that it will disrupt operations and negatively impact your current processes. You may wonder, "How will I manage EVs alongside conventional vehicles?" or "What additional systems will I need?" While change can be hard, ChargePoint solutions are designed to make adding EVs to your fleet easy and fit in with how you already work.

Integrate with Existing Systems

ChargePoint solutions help simplify operations by integrating with your existing fleet management tools such as AssetWorks and telematics providers including Geotab. ChargePoint APIs and out-of-the-box integrations with popular fleet management systems minimize disruptions to your existing workflows and reporting.

Bring All Your Data Together with ChargePoint

Charge on the Go; Never Get Stranded

ChargePoint operates the world's largest EV charging network. If your drivers need to charge on the go, they can leverage any public ChargePoint station using their EV fleet RFID cards. WEX or Voyager fuel cards can be easily added as payment source for on-route charging.

Collaborate with Expert Advisors

With ChargePoint, you'll work with experienced industry leaders to create a complete solution that covers everything from design to operational execution. We'll be there for you from start to finish. Leverage our experience to plan your project, design your site, work with installers to configure your solution to the needs of your specific fleet and get ongoing support after activation.

Charging Solutions for Every Fleet at Any Site

From dedicated electric fueling at secure depots to publicly accessible commercial charging and high-powered DC fast solutions, ChargePoint has a smart, networked station for every use case. Not sure which option is right for you? The ChargePoint team will help identify the perfect solution for your site and fleet deployment.

Behind the Fence

The CPF50 is the ideal AC charging solution for light-duty vehicles. The station is available in multiple configurations to address the needs of any site.

Fast Turnaround

DC fast charging is an important part of the EV charging strategy for large fleets. The ChargePoint Express 250 can fast charge everything from light-duty to heavy-duty EVs.

Mixed Use

For locations that serve your fleet and the public, the CT4000 is the right choice. Its intuitive design makes it easy for any driver to use.
