

# Charge your EV with our ChargePoint Home Flex

Everything you need to know to keep your EV charged up

## Charging with ChargePoint Home Flex is easy and convenient.

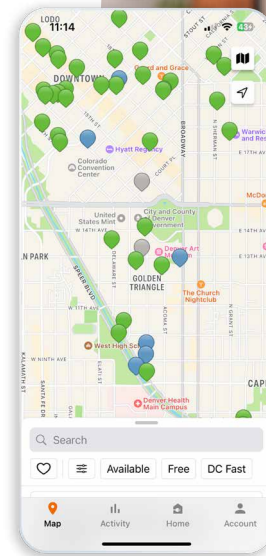

- + To get charging quickly, plug in your EV and go about your day. It's that easy.
- + This award-winning home charger works with any EV, including Tesla.
- + Quickly fuel your EV to its full range while you sleep, hit the town and more.

## The station's glowing LED indicator shows your real-time charging status.

- + Green: ready to charge
- + Blue: plugged in (pulsing blue means the station is actively charging the car)
- + Red: something's up – please get in touch with us!
- + White: the station might have an issue connecting to WiFi, but it should still be able to charge your EV

## Charging around town? With the ChargePoint app installed, you can start a charging session on a ChargePoint station by holding your phone over the reader symbol.

- + Get the ChargePoint app and sign up or log in.
- + If you create an account for the first time, set up Tap to Charge by adding ChargePoint to Apple Wallet (iPhone) or turning on NFC (Android).
- + Once you've set up Tap to Charge, hold your phone up to the station's reader to unlock the connector. Make sure you've turned on NFC and your screen is on for Android. For iPhone, if you're not using Face ID, double-check that your finger is on the home button to use Touch ID.
- + Plug in your car and go about your day. It's that easy.
