

# ChargePoint Express 280

A flexible, reliable and easy-to-use DC fast charging solution

## Deliver high power, optimize space

ChargePoint® Express 280 provides uncompromising power, dependable performance and a premium EV charging experience to any business or fleet.

### Thoughtful design meets dependable performance

With a compact form factor and redundant power delivery capabilities, the Express 280 is designed to fit anywhere and provide exceptional reliability.

### Create your own premium charging experience

Our intuitive user experience, open APIs and consumer loyalty integrations make it easy to customize your stations to enhance your brand, so customers come back to charge.

### Easily launch and manage your EV charging solution

We provide the support, monitoring and analytics tools, and energy management features you need to achieve your business goals.

Gain complete control with unified EV charging software. Get real-time visibility into power use, costs, and station status. Set custom pricing and manage access remotely for total security.

Leverage 35+ prebuilt reports to track usage, fees, station health, and environmental impact with ease.

## Ideal for

Auto dealerships

Commercial real estate

Fleet

Fueling & convenience

Retail places

Many more sites

## Benefits of ChargePoint Express 280

Ergonomic and integrated cable management helps drivers reach all EVs while keeping lots safe.

An advanced display provides real-time session analytics, offers a range of flexible payment options to users and can promote tailored media content.

Flexible cable and connector options provide compatibility for EVs on the road today and tomorrow - while charging one vehicle at a time.

Operate fleets more efficiently with sequential charging — a method that charges multiple EVs one after another and ensures that each vehicle gets a full charge as quickly as possible.

Minimize downtime and repair costs with proprietary, industry-first cut-resistant cable options.

Simple, customizable inserts help showcase your brand.

Ventilation supports high power for optimal performance.

A smaller footprint increases flexibility, reduces installation costs and allows for the deployment of more stations per parking lot.

## Technical Specifications

Feature	Description
Output power and current	CCS1 & NACS 250A/CHD 140A 80 kW; 160 kW Paired; output voltage 100–1000V
Payment options	Tap to Pay, Tap to Charge, and payment through other applications are standard
Standard cable length	18' (5.5 m), 24' (7.5 m)
Station footprint	7 ft 11 in x 2 ft 4 in x 1 ft 4 in (2.413 mm H x 712 mm W x 438 mm D)
Operating temperature	-40°F to 122°F (-40°C to 50°C)
Vehicles and standards	All vehicle types and industry-standard communication protocols are supported (OCPP 2.0/Plug & Charge)

## About ChargePoint

ChargePoint is a leading provider of electric vehicle (EV) charging solutions, powering the shift to electric mobility across North America and Europe. Since 2007, we've built one of the largest and most open EV charging networks, giving drivers and businesses reliable access wherever they need it.

We serve a wide range of customers, including commercial businesses, fleet operators, and residential drivers, with a full-stack portfolio of AC and DC charging hardware, intelligent software, and comprehensive services. Our platform enables seamless charging experiences, efficient energy management, and scalable infrastructure tailored to each customer's needs.

ChargePoint is trusted by many of the world's top companies, major auto makers, and drivers. Our solutions help businesses attract and retain customers, reduce emissions, and future-proof their operations.

*For channel partners, ChargePoint offers a robust ecosystem of products, tools, and support to help grow their business, deliver value to customers, and accelerate the adoption of electric mobility in their markets.*

With deep industry expertise and a commitment to innovation, ChargePoint is accelerating the transition to electric mobility, supporting the infrastructure of today while building for the future.

## Let's get started

We're always here to help you identify your charging goals, advise on the best approach and help evaluate your site.
