

# EV charging solutions for your workplace

## How EV charging benefits your business

### Attract & retain top talent

Show your commitment to sustainability and make your benefits package a magnet for talent.

### Meet employee demand **within budget**

Provide convenient and reliable charging that can scale cost-effectively as your needs evolve.

### Achieve sustainability goals

Reduce GHG emissions and reach company-wide sustainability goals.

## Why choose ChargePoint® for your workplace?

### Software

Optimise station usage, set pricing and get full control over who can charge.

### Hardware

Implement stations that work for all vehicle types and brands.

### Services

Access 24/7 driver support, proactive monitoring and maintenance.

## Solutions that boost employee satisfaction and ROI

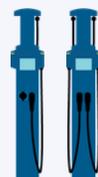

### Give more drivers a charge with Waitlist

If all chargers are in use, ChargePoint Waitlist automatically places drivers in virtual queues and notifies them when a station frees up. Waitlist manages your EV charging demand without requiring your constant attention.

### The fastest AC charge for any EV with the ChargePoint 6000

Provide up to 22.2 kW per port to support both current and next-generation vehicles. Ensure multi-regional compliance for all European standards, while reducing the total cost of ownership through a modular, service-friendly design.

## Ready to electrify your workplace?
