

be.ENERGISED for energy utilities

Six reasons be.ENERGISED is great for energy companies

Offer utility-branded EV charging services to create new revenue streams and maintain customer loyalty.

1

Fastest go-to-market

Implement the be.ENERGISED software solution quickly to expand your core service offerings and generate new revenue streams.

2

Flexible, scalable solution

Future-proof your business with an EV charging software solution that offers a range of functionality that can evolve as your e-mobility business grows.

3

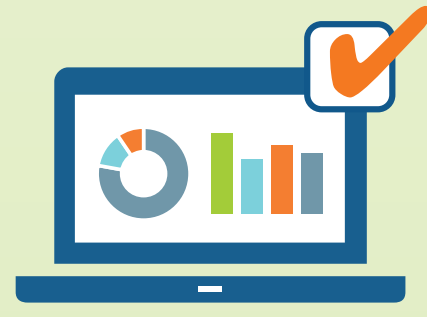

White-label services

Secure customer loyalty and stay ahead of the competition by offering utility-branded EV charging solutions that offer customers a seamless experience.

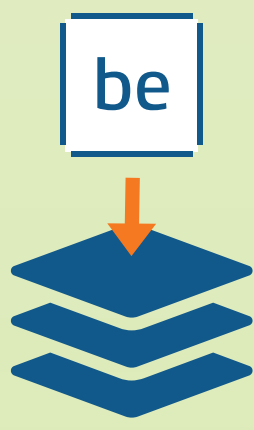

4

Streamlined operations

Manage your EV charging infrastructure efficiently with one easy-to-use software solution.

5

Systems integration

Maintain architectural integrity and software system interoperability as you integrate be.ENERGISED into your existing IT solutions and also maintain complete ownership of customer data.

6

Reliability

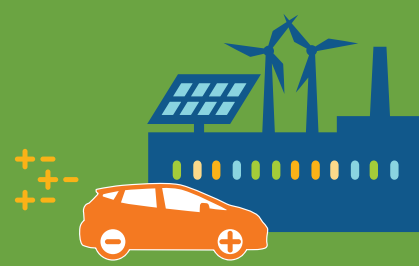

A 24/7 help desk guarantees maximum station uptime across Europe.
